

CHECK THE HALLS!

HOLIDAY FIRE SAFETY TIPS

As you deck your halls, check your halls to make sure they are fire safe!

LIVE TREES NEED WATER

Water your tree regularly. Dry trees can catch on fire and will burn incredibly fast and hot.

INSPECT LIGHTS

Prevent fires and shocks by throwing out frayed or damaged light sets.

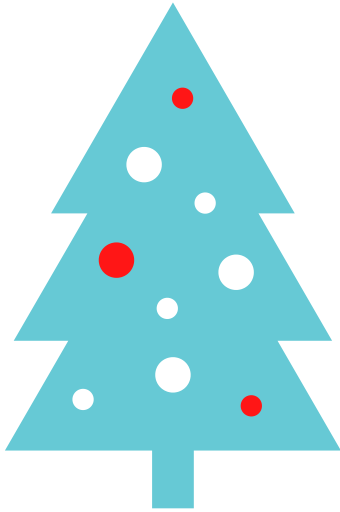

CANDLE CAUTION

Keep candles at least 12 inches from anything that burns. Never leave candles burning unattended. More than 1/3 of home decoration fires are caused by candles. Consider battery-operated candles.

Arson Investigating Dog

THE PERFECT SPOT

Keep trees at least 3 feet away from fireplaces, heat vents, candles and heat sources. Water your tree every day.

SAFE COZINESS

Don't put flammable items near your fireplace. Make sure your fire is out before you leave or go to bed. Always use a fireplace screen to catch sparks.
